1961

New

LILAC TIME

Lilac Time bears many giant 5 inch blooms in the true cactus type, in a pleasant range of shades of rosy lilac, with the young petals in the center of the flower distinctly lighter than when fully expanded.

PRIDE (of dieldrin) ZINNIA

LILAC TIME ZINNIA — Electros #3131J, \$55.00 per set.

CHERRY TIME ZINNIA — Electros #3124J, \$55.00 per set.

Cactus Flowered Zinnias

CHERRY TIME

Impressive blooms 5 inches across in closely related tones of cherry, rose red, spiraea red and magenta rose, all deep and strong.

PRIDE (of dieldrin)

A remarkably vivid combination of golden orange and scarlet flame, with the stronger color at the heart of the flower. Good plant height and vigor.

SNOW TIME

Nearest to white of any cactus flowered zinnia, Snow Time is vigorous and full-size in both plant and flower.

DARK JEWELS

Richly endowed with the deep, strong colors of the new varieties in this class, Dark Jewels is a formulated mixture much superior to the old field-grown cactus hybrids.

Electros #3107K, \$75.00 per set.

DARK JEWELS ZINNIA — Electros #3125G, \$40.00 per set.

SNOW TIME ZINNIA — Electros #3146H, \$47.50 per set.

ORTHO POLKA ZINNIA — Electros #3098H, \$47.50 per set.

ORTHO POLKA ZINNIA

Big, 4 inch blooms, with a high percentage gaily striped in yellow and red, orange and red, and rose and white.

CRACKERJACK MARIGOLD

Crackerjack has rapidly assumed a commanding lead in tall African marigolds. Early and compact, with huge, strongly double flowers in a full color range.

CRACKERJACK MARIGOLD — Electros #3092H, \$47.50 per set.

MIDGET MIXED MARIGOLD

The dwarfest mixture of French marigolds we offer, Midget Mixed is a formula blend with special emphasis on expansion of the color range. Plants grow only six to eight inches tall, but produce a great number of blooms in primrose, yellow, gold, and orange solid colors as well as bicolors of golden orange with a red area at the base of the petals, deep red with gold centers, and deep orange with maroon guard petals.

NEW

MIDGET MIXED MARIGOLD — Electros #3143G, \$40.00 per set.

MARDI GRAS SNAPDRAGON

An early-blooming, vigorous F_2 mixture with a wide color range obtained and controlled by specially bred F_1 hybrid parents.

MARDI GRAS SNAPDRAGON — Electros #3096G, \$40.00 per set.

The Lustre Petunias

SCARLET LUSTRE

F₁ Hybrid Grandiflora Petunia

Vivid scarlet, fringed blooms accented with a bright yellow throat make this hybrid an eye-catcher in any company. Less botrytis susceptible than the leading contenders in this color, Scarlet Lustre gives more bloom on better plants. Plants grow a foot tall, spreading to 2 feet across.

SCARLET LUSTRE PETUNIA — Electros #3122G, \$40.00 per set.

SCARLET LUSTRE PETUNIA — Electros #3122G, \$40.00 per set.

SALMON LUSTRE

F₁ Hybrid Grandiflora Petunia

Vigorous plants, with an abundance of soft salmon-pink blooms characterize this new member of the Lustre series.

BLUE LUSTRE

F₁ Hybrid Grandiflora Petunia

The first of the Lustre group, and still the very best of the deep violet-blue grandiflora hybrid petunias. Early.

BLUE LUSTRE PETUNIA — Electros #3113G, \$40.00 per set.

ROSE LUSTRE

F₁ Hybrid Grandiflora Petunia

Outstandingly beautiful bright rose blooms with waved petal edges and a light yellow throat. Very compact plants.

ROSE LUSTRE PETUNIA — Electros #3129G, \$40.00 per set.

The *Satin*

RED SATIN

F₁ Hybrid Multiflora Petunia

Easily the most admired red petunia, this All-America winner produces brilliant scarlet-red blooms which hold their color even under hot sun. But at least equally admired is the plant itself, for the dwarf, rounded, compact habit of growth is the ideal form for this flower class.

WHITE SATIN

F₁ Hybrid Multiflora Petunia

Excellent reports have been received from all areas following the introduction of White Satin in 1960, with the comment "best white in trial" recurring frequently. Distinctly earlier than other white hybrids, and more uniform in maturity and flower production.

PINK SATIN

F₁ Hybrid Multiflora Petunia

With masses of rose-pink blooms covering mounded, compact plants, Pink Satin never has a "bad season", continuing to look beautiful when others have collapsed in old age.

PEACH SATIN PETUNIA — Electros #3141F,
\$35.00 per set.

RED SATIN PETUNIA — Electros #3135G, \$40.00 per set
WHITE SATIN PETUNIA — Electros #3140G, \$40.00 per set.

PINK SATIN PETUNIA — Electros #3109GA, \$40.00 per set.

Petunias

CORAL SATIN

F₁ Hybrid Multiflora Petunia

All-America winner for 1961, and enthusiastically received by seedsmen throughout the world. The very compact, very dwarf plants hold their typical "Satin" form and produce masses of lovely coral-rose blooms. Resistant to wet weather.

PEACH SATIN

F₁ Hybrid Multiflora Petunia

Young blooms are almost coral in tone, softening as the flower unfolds to a warm salmon-pink.

DAWN SATIN

F₁ Hybrid Multiflora Petunia

New this year, Dawn Satin joins the Satin series of dwarf, compact hybrids, contributing blooms of a soft shade of Neyron rose, or light pink. For the gardener who desires the most delicate pink color combined with persistent bloom and dwarf habit, this is the perfect hybrid.

CORAL SATIN PETUNIA — Electros #3142H, \$47.50 per set.

PLUM DANDY PETUNIA — Electros #3144G, \$40.00 per set.

PLUM DANDY

F₁ Hybrid Multiflora Petunia

Here's a real shocker! This hybrid is a stand-out both in production of flowers and in commanding fuchsia purple color. Genuinely admirable performance. 15".

BLUE RIBBON

F₁ Hybrid Multiflora Petunia

Top-notch violet-blue multiflora, with long and energetic blooming habit. Taller growing than the Satins. 18".

DAWN SATIN PETUNIA — Electros #3145G, \$40.00 per set.

DIANTHUS BRAVO — Electros #3148E,
\$30.00 per set.

BRAVO PRESENTATION MATERIAL

Photographs: A number of alternatives are available in 4" x 5" Ektachrome, 35mm slides, and 8" x 10" black and white.

Electros: Beside those shown on this page, the front cover plates are available (without type matter) as #3137L for \$130.00 per set.

Color Packets: From both Stecher-Traung and Schmidt Lithograph.

All-America Publicity: Begins January, 1962.

DIANTHUS BRAVO — Electros #3150G, \$40.00 per set.

Bravo!

ALL-AMERICA  SELECTIONS

1962

Originated by T. Sakata & Co., Yokohama, Japan

Grown in U.S.A. by Bodger Seeds Ltd.

DIANTHUS BRAVO — Electros #3149G, \$40.00 per set.

DIANTHUS BRAVO

Winner of a Silver Medal in the All-America trials, Bravo brings a new and bright scarlet-red color to annual dianthus. Blooms are lightly fringed, measure 1½" to 2" across, and are carried above the foliage. The plants are exceptionally useful in form, with an upright yet dwarf and compact habit that makes them ideal for edging and border purposes. The height is about 8", and the blooming period protracted during the late summer and fall months.

HOW TO ORDER

When you have an order with a number of items just fill in the quantities in the space next to each item in this catalog and send the whole book to us in the enclosed postage-free envelope. We will promptly mail you a fresh catalog. If you have only a few items, use our speedy self-mailing order blanks, available bound in books on request. There are distinct changes in pricing policy this year. Be sure to read pages 12 and 13.

TERMS OF SALE AND CONDITIONS OF DELIVERY

Prices quoted in this list go into effect immediately for spot sales and 1961 contracts, superseding all previous quotations.

Please Note!

1. We no longer charge you for the containers in which the seed is packed. The price quoted for each unit of weight includes containers, whether V-seal or cotton bags.
2. Shipping cartons or bags and packing (that is, the exterior cover under which the seeds are shipped) will continue to be charged for as in the past, and are not returnable.
3. Quarter pounds, and other fractions of a pound, are now listed in detail in the catalog. Therefore, when you order $\frac{1}{4}$ lb. of seed you can find a specific price for it in the price list. **THIS MEANS THAT YOU NO LONGER CALCULATE $\frac{1}{4}$ LB. OR 6 OZ. OR OTHER FRACTIONS AT THE POUND RATE.** The rate is figured for you.
4. One ounce prices are, in general, much reduced from catalogs of previous years. This permits you to order 16 one ounce packages at what amounts to the pound rate plus labor and packaging cost to cover handling the smaller units.
5. We now offer many smaller units than ever before so that you can take advantage of the protection V-seal offers. Most of these small units are offered in cartons of four packages, **and are not available singly unless priced that way in the list.**

HOW TO ORDER

If you use this catalog as an order form you will find it very simple to indicate the quantities you want on the dotted lines provided next to each item. We will replace your catalog with a fresh copy by return mail.

Examples:

ASTER BOUQUET TYPE					No charge for containers					
Specify the number of packages you want of each size.										
Cartons of four					Carton of four					
$\frac{1}{4}$ oz. pkgs.	Ounces	$\frac{1}{4}$ lbs.	1 lbs.		$\frac{1}{4}$ oz. pkgs.	Per oz.	Per $\frac{1}{4}$ lb.	Per lb.		
.....	6		278	AZURE BOUQUET	2.50	1.95	7.75	30.50		
.....	2	1	280	CRIMSON BOUQUET	2.50	1.95	7.75	30.50		
.....	4	3	282	DEEP CREAM BOUQUET	2.50	1.95	7.75	30.50		
1			294	POWDERPUFFS	2.20	1.70	6.50	25.50		
LATHYRUS LATIFOLIUS										
 2					4568	MIXED	—	.65	2.25	8.50

In the first line (above) the order is for six 1 oz. packages of Aster Azure Bouquet. The 6 in the ounce column indicates the fact that six packages are wanted, and the fact that the price is printed in red indicates that the seed is pre-packed in this size in V-seal only. This line would be billed, then, at six times the ounce price of \$1.95, for a total of \$11.70.

In the second line (Crimson Bouquet) the order is for the same total amount of seed, but two 1 oz. packages and one $\frac{1}{4}$ lb. package are specified. This seed would be billed at twice the ounce price of \$1.95 plus one unit of the $\frac{1}{4}$ lb. size at \$7.75, for a total of \$11.65. These, because it is indicated by red figures, would be packed in V-seal.

In the third line (Deep Cream Bouquet) the order calls for four 1 oz. packages, three $\frac{1}{4}$ lb. packages, and one 1 lb. package, for a total value of \$61.55 for the total weight of 2 lbs. of seed, all in V-seal.

In the fourth line (Powderpuffs) one carton of four $\frac{1}{4}$ oz. V-seal packages is ordered, and will be delivered at the carton unit price of \$2.20.

In the last line (Lathyrus Latifolius Mixed) the wavy arrow calls attention to the fact that none of the unit prices are printed in red, so no seed is packed in V-seal, so whatever quantity is ordered the figure should be placed in the space provided. In this case 2 lbs. are ordered, which would be billed at two times the 1 lb. price, for a total of \$17.00. If you should order 6 oz. of this seed it would be delivered in one cotton bag and priced at $1\frac{1}{2}$ times the $\frac{1}{4}$ lb. price, or \$3.38.

V-SEAL vs. BULK SEED

Please note that wherever the price figure is printed in red the seed is pre-packaged in V-seal units, and is available only in those units. Where prices appear in black the seed is not processed and is not packed in V-seal.

ORDERING ON YOUR OWN FORMS

Should you place your order on our speedy self-mailing order blanks, your own purchase order, or ordinary letter, please indicate the number of units you wish to receive of each size.

Examples: If you want four 1 oz. packages, please write the order as follows:
4 x 1 oz.

If you want $\frac{3}{4}$ lb. of seed please specify the size and number of units, as:

4 x 1 oz. or 12 x 1 oz. or 3 x $\frac{1}{4}$ lb.
2 x $\frac{1}{4}$ lb.

The minimum charge for each item billed will be fifty cents, due to the cost of handling small units.

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 1 % cash 30 days . All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery or from packaging in V-seal.

BODGER SEEDS LTD. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fires, and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

PICTURES, PLATES AND PUBLICITY

EKTACHROMES: If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can usually supply high quality 4 x 5 or 8 x 10 inch color photographs on a loan basis, the Ektachromes to be returned after use. Please write for information about availability of specific subjects in which you are interested. Sixty day rental feeEach \$15.00

PHOTOGRAPHS: We can supply professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8" x 10", single weight glossy paper.Each \$2.00

KODACHROME SLIDES: We can supply high-fidelity 35mm slides (mounted 2" x 2") of many of the flowers we grow. These are close-ups of individual flowers or groups, manufactured from our professional-size originals.Each 60c

PUBLICITY MATERIAL: Each spring we send a series of releases of garden information to hundreds of newspapers, radio and television stations, and magazines. They are widely used by garden editors. If you have need for this type of material, or if you have a suggestion to make concerning the addition of a publication or station to our list, just drop us a line and we'll be glad to comply. The service is free.

COLOR PLATES: We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and MADE UP TO ORDER ONLY. Allow ten days for completion of your order.

Electros of color plates are supplied unmounted (patent base) unless mounting is specifically requested. There is an additional charge of 25% for mounting. If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

ELECTRO PRICES ARE AS FOLLOWS:

SIZE	APPROX. DIMENSIONS	4-COLOR PROCESS
A.....	1 1/4" x 1 1/2"	\$ 22.50
B.....	2" x 2"	22.50
C.....	2" x 2 1/4"	22.50
D.....	2 1/4" x 2 1/4"	25.00
E.....	2 3/4" x 2 3/4"	30.00
F.....	2 3/4" x 3 1/4"	35.00
G.....	3 1/4" x 4 1/4"	40.00
H.....	4 1/4" x 5 1/4"	47.50
J.....	5" x 6"	55.00
K.....	Larger	75.00

LITHOGRAPHIC SEPARATIONS: If you print by lithography we can supply dot reproduction proofs of any of our color plates for easy conversion to offset printing. Cost is \$16.00 per set, regardless of size.

V-seal (Vitalseal) is a Bodger program for processing and packaging flower seeds. Its object is to dry the seed to an unusually low point and to keep it dry in specially fabricated pouches in order to preserve the germination and vitality.

It has been demonstrated conclusively by research workers in many segments of agriculture that seed deteriorates mainly as the result of exposure to the high or varying humidity that is common throughout the world, and that the higher the humidity the quicker the deterioration. Conversely, at very low humidities seed maintains its ability to germinate for incredible lengths of time, even when the normal life span might be only a single season. Bodger research has been devoted to extending these basic principles to flower seeds and to developing a package which is flexible in size, durable, and highly resistant to moisture vapor transmission.

What does this V-seal program mean to you? First, it means that your flower seeds are dried promptly and scientifically upon harvest. This amounts to "curing" under control, a great improvement over taking chances with variations in the weather. It results in less chance of seed-borne disease and insect infestation, and promotes higher germination at the outset. The seed is dried to its ideal moisture content, a different point for different kinds. The ideal is the point at which the seed keeps best — not too dry, not too moist.

As soon as processing is complete the seed is stored in moisture-proof bulk containers until germination tests have been made, and then it is packed in various size units of V-seal pouches. This packing is done in a room which is held under rigid control at very low humidity and uniform temperature. Once heat-sealed the V-seal pouches maintain the low relative humidity like a time capsule, regardless of surrounding conditions. This sealed-in climate travels with the seed to you and retards aging so much that you can depend on the seed to germinate satisfactorily for as long as you care to hold it on inventory.

Of course, this is of prime importance to you in the case of short-lived types like aster, larkspur, delphinium, and so on, for inventory at the end of the season has always been a complete loss for responsible seedsmen. Even longer-lived kinds like zinnia keep better in V-seal and have greater vigor than unprotected seed after only a few months of storage under unfavorable conditions.

In the last analysis, what we are all trying to accomplish is to provide the gardener with fresh, vigorous, high-germinating seed. He gets just that if it has been held at its peak of perfection in V-seal, for the normal aging of the seed does not begin until the package has been opened, and both you and your customer may expect the seed to continue to live as long after it has been released from control as if it had been brought directly from the field at that time.

You will note as you leaf through our catalog that a number of the prices are printed in red ink. These are the varieties and units of size packed in V-seal this year. A number of species are being offered in V-seal for the first time this year. Others will be added in the future as our research continues.

You will get the most out of V-seal if you do a little calculating in advance of ordering. It is wise to order in multiple units, and then open the packages as needed. For example, instead of ordering a single 1 lb. package of aster, order 16 x 1 oz., or 4 x 1/4 lb., or 2 x 1/4 lb. and 8 x 1 oz. The reason for this method lies in the fact that once the seal has been broken the ideal storage conditions are lost, and resealing simply seals wet air (it may not feel wet to you, but it is) in the package.

Plan to store your V-seal inventory in a place of uniform temperature if you are seeking perfection. The basement is a good spot, for the moisture which made it unsuitable in the past has no effect on the V-seal pouches.

V-seal is important to you because it assures you of top quality seed on shelf, regardless of the length of its journey to you or the humidity through which the pouches may have passed. It is important because it keeps the seed fresh for as long as you may need to hold it yourself. It is important because your customers will find the seeds you sell to be unusually vigorous and high in germination.

ASTERS

All Asters listed here can be grown by the home gardener wherever Asters are popular. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

ASTER PRINCESS IMPROVED WILT RESISTANT (Bodger)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

The Princess Improved strain has a compact branching plant form 20" - 24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing.

OLD MEXICO

1962

The All-America awards for 1962, announced after our catalog went to press, give high honors to this new tetraploid zinnia, and we are glad to be able to offer seed from 1961 crop.

Old Mexico is derived from the same general parentage as Persian Carpet (also an All-America winner), but the flowers are much larger, averaging 2½ inches in diameter. The blooms are sharply bicolored, with the main petal area a deep mahogany-red, and with the petal edges and tips overlaid with shades of gold.

Plants grow 12 to 15 inches tall, producing a large number of blooms over a long period. Like Persian Carpet, this variety is strongly resistant to mildew and other foliage diseases, a genetic advantage which contributes to the longevity of the plants.

Offered only in V-seal pouches.

¼ oz. \$1.30; 1 oz. \$4.25; ¼ lb. \$16.25; 1 lb. \$65.00

FLOWER SEEDS

We call particularly to your attention the fact that this catalog now offers a larger assortment of sizes of packages than ever before. This is the result of the expansion of the V-seal system so that more seeds are protected against aging, and smaller units are being packaged in V-seal in order to hold this protection to the ultimate. For instance, when you open a one ounce package of aster seed and use only a part of it, the balance goes out of longevity control as soon as you open the package. If you have ordered a carton of four 1/4 oz. packages, you can continue the control in four sections.

Since V-seal involves pre-packaging in regular packing runs as the seed is processed your order is no longer filled in the old cracker-barrel method. The seed is held under control right from the beginning of its storage following harvest, and your one ounce package of larkspur was put up perhaps a month before you ordered it.

However, pre-packaging does require one important piece of co-operation on your part. Please observe the size units offered in the price columns. If we offer only 1/16 oz. units and 1/4 oz. units, then 1/8 oz. units are not available, and you should order 2 x 1/16 oz. if you need that quantity. Similarly, the smallest unit offered in V-seal in the catalog is the smallest unit available. Please observe this limitation when ordering to avoid unnecessary delay in correspondence.

ANTIRRHINUM (Snapdragon)

ANTIRRHINUM F₁ HYBRID ROCKETS (Hybrid Snapdragon) (af)

While F₁ hybrid snaps have been in use by greenhouse growers some time, this series of Rocket hybrids is the first to be marketed for outdoor garden use. The reliability and endurance of these fine hybrids has been demonstrated across the entire country and their superiority above standard varieties is as evident as that of F₁ petunias over open pollinated strains. A trade pkt. equals approximately 1/128 oz.

-------	------	--	------	------	-------	-------

GERBERA (Transvaal Daisy) (grf)

A superior strain of good vitality developed recently on the Pacific Coast, containing single and semi-double flowers with a greatly improved color range, especially in the desirable light shades.

Best germination results from the following technique. Dust seed with chlordane to prevent pre-emergence insect damage. Sow on top of seed bed, covering as lightly as possible with peat or similar material. Hold only slightly moist for first 4 days and give heavy moisture thereafter. Germination begins in 7 to 9 days and is complete in 14 days.

F₁ HYBRID PETUNIAS

F₁ hybrid petunias are divided into three broad classes, multifloras, grandifloras and doubles. All show greater vigor and greater flower production than the old open pollinated types from which they were derived, but between hybrids there are differences well worth noting. The F₁'s listed in this catalog have all been tested in exhaustive trials which are conducted annually by our research department, and we believe them to be the outstanding colors in each class.

All F₁'s are packed in V-seal to preserve vigor and germinating ability. Seed count averages 345,000 per ounce; a trade packet contains approximately 1/256 of an ounce.

PETUNIA F₁ HYBRID MULTIFLORA (af)

The multiflora class has flowers which correspond in size and character to the old hybrida and hybrida nana compacta types, but the comparison ends at that point, for F₁'s have impressively greater capacity to produce flowers than their open pollinated parents, and the breeder has been able to exert closer control over plant habit as well, increasing uniformity and reducing undesirable characteristics. A prime example is the Satin group, listed below.

THE SATINS

With Red Satin leading the way in 1957, earning an All-America award in that year, the Satin Class has expanded until there are now six hybrids of similar plant and flower type. The class is outstanding in its dwarf, compact habit of growth.

Specify the number of packages you want of each size.					No charge for containers

.....				8996	CORAL SATIN (Bodger) ALL-AMERICA SELECTIONS '61. With its true Satin-style, tenaciously compact plants, its ability to bloom beautifully right through rainy and windy periods, and its lovely coral-rose flowers Coral Satin now wins the same All-America honors for 1961 as Red Satin did in 1957. Plants retain their low mound form even to the end of the season, filling their centers with blooms instead of splitting open as they age. Flowers are 2" to 2 1/2" across, midway between Peach and Red Satin in color effect.	4.40	4.00	15.50	61.50	245.00
.....				8994	DAWN SATIN (Bodger), new this year this admirable hybrid helps fill out the spectrum in the Satin series with a light pink flower, lighter than either Pink or Peach Satin. The exact color is a light shade of Neyron rose, well illustrated by the color plate on page 7. The typical dwarf, compact Satin type plants grow only 12" tall, and maintain this habit, covered with bloom, all season long.	4.20	3.75	14.25	56.50	225.00

Sizes priced in red are packed only in V-seal.

.....				9016	PEACH SATIN (Bodger), a lovely multiflora with unusually large flowers which open first to a coral color, changing the next day to an appealingly soft salmon-pink. Plants are well-behaved, compact and carry the will-to-bloom feature so prominent in the best F ₁ hybrids. (A.M., R.H.S. '59)	3.40	2.90	11.50	45.25 180.00
.....				9018	PINK SATIN (Bodger), increasingly popular, for its rounded, compact plant habit, tremendous production of blooms, and excellent rose-pink color all come close to the ideal for this class. Time after time in comparative trials Pink Satin not only surpasses other multifloras in neatness and floriferousness during the course of the season but continues to look fresh and young after all those around it have deteriorated in old age. (A.M., R.H.S. '59)	3.40	2.90	11.50	45.25 180.00
.....				9026	RED SATIN (Bodger) ALL-AMERICA SELECTIONS '57. The vivid scarlet-red All-America winner with the persistently dwarf, compact, rounded plants so warmly welcomed by gardeners. Pictured and described on page 6. (A.M., R.H.S. '59)	3.40	2.90	11.50	45.25 180.00
.....				8990	WHITE SATIN (Bodger), a welcome addition to the Satin class, these pure white flowers are borne on typical Satin-type plants and have the added feature of a slight crepe effect in the petals. White Satin comes into bloom earlier than other white multifloras, and preserves its neat appearance to the very end of the season.	3.40	2.90	11.50	45.25 180.00

OTHER F₁ HYBRID MULTIFLORAS

.....				9006	BLUE RIBBON (Bodger), this top-notch multiflora hybrid blooms freely and reliably in all areas, bearing large numbers of deep, violet-blue flowers. Seedsmen of wide experience in hybrid petunias call this the best blue multiflora presently on the market, but it is not included among the Satins because of its larger plant habit. (A.M., R.H.S. '59)	3.40	2.90	11.50	45.25 180.00
.....				9044	PLUM DANDY (Bodger) new. A very bright, very compelling shade of fuchsia purple on husky and productive plants. This hybrid has been one that stood out among the hundreds in our trials, and it will certainly excite favorable comment among your customers. 15" tall. Illustrated on page 7. ...	3.40	2.90	11.50	45.25 180.00

PETUNIA F₁ HYBRID GRANDIFLORA (af)

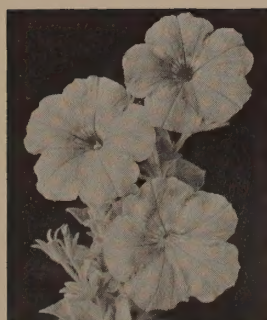

The grandiflora class has flowers which correspond to the open pollinated grandifloras, with larger blooms than the multifloras, but generally somewhat fewer. Nonetheless, a good grandiflora hybrid will give the same mass-of-bloom effect as multifloras because even though less in number the larger blooms tend to cover the plants completely during their heaviest blooming periods. Some hybrids in this class are heavily fringed or ruffled, while others have plain edges but extra large blooms measuring up to 4 1/2" across.

THE LUSTRES

This superior group, beginning with Blue Lustre, is now expanded to the four hybrids listed below. All have waved petals, all have compact, low-growing plants, all produce well under a wide range of climatic conditions.

Specify the number of packages you want of each size.						No charge for containers				
Trade Pkts.	1/64 oz.	1/16 oz.	1/4 oz.	1 oz.		Trade Pkts.	1/64 oz.	1/16 oz.	1/4 oz.	1 oz.
.....				9052	BLUE LUSTRE (Bodger), the big waved grandiflora flowers are deep mid-blue in hot weather, becoming almost as dark as Elk's Pride in cool weather. Plants grow 1 foot tall and 1 1/2 to 2 feet across, beginning to bloom very early and continuing without interruption to the very end of the season. See color illustration on page 5. (A.M., R.H.S. '59)	1.40	5.15	20.25	80.25	320.00
.....				9072	SALMON LUSTRE (Bodger), while the exact color of an individual flower is hard to define, the garden effect of this new and beautiful Lustre is a rich salmon-pink. Plants grow only a foot tall, spread to two feet across, and produce steadily over the whole plant area right through the season. See color illustration on page 5.	1.40	5.15	20.25	80.25	320.00

PELLETED SEED

F₁ HYBRID PETUNIAS

The technique of applying an inert coating to small, expensive seeds has advanced greatly in recent years. Pelleted seed is now reliable and quick in germination, and with this fact the obvious advantages of the processed seed can be utilized.

Increasing the size of F₁ hybrid petunia seed to approximately the size of Balsam seed makes it possible for the seed to be packaged by machinery, makes inner liners unnecessary, makes 100 seeds look like a respectable amount, and makes it possible for amateur gardeners to space and plant these expensive seeds in such a way as to make success much more likely than with raw seed.

Special planting instructions are imperative when pelleted petunia seed is delivered, and we will be glad to provide a suggested cultural technique on request.

In general, there is about an 90-fold increase in size between raw and pelleted petunia seed, although this may vary somewhat.

We expect to have supplies of each of the hybrids listed below pelleted and in stock for delivery at normal shipping time. The coated seed will be processed and packed in V-seal pouches.

## SWEET PEAS

The numbers in parenthesis following Sweet Pea descriptions refer to horticultural color chart readings.

**SWEET PEA ZVOLANEK MULTIFLORA** (af)

A garden sweet pea more vigorous than Early Spencer. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the Early Spencers. We recommend this strain.

It must be remembered that these dates are approximate, and for a normal year. Adverse weather and other conditions we cannot control may delay delivery at certain times.

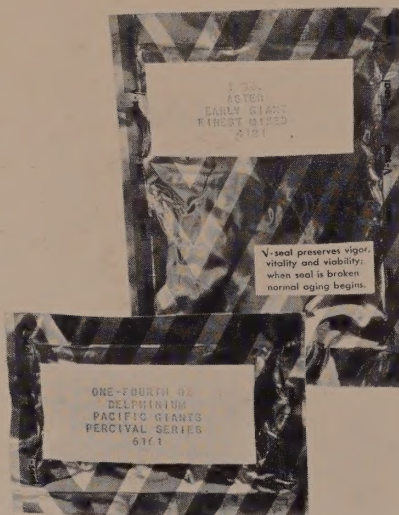

# V[®] seal saves seeds

Filling V-seal packages with small amounts of expensive seed like  $F_1$  hybrid petunias requires highly accurate scales and painstaking care.

Moisture control in V-seal processing involves specialized equipment for moisture testing both seed and atmosphere.

V-seal pouches are flexible in size, admirably adapted to small units, and very efficient moisture vapor barriers.

The V-seal units offered in this catalog are pre-packaged as soon as processing is completed, facilitating speedy order filling.
